Summary

Software Engineer with experience building enterprise backend applications using Java, Spring Boot, Python, SQL, and REST APIs. Skilled in developing scalable microservices, database optimization, software engineering best practices, CI/CD, unit testing, and Agile development.

Experience

System Engineer

Dec 2025 – Present

Tata Consultancy Services (TCS)

- Developed backend services using Java, Spring Boot, REST APIs, and SQL for enterprise applications following clean architecture and coding standards.
- Developed and enhanced Java Spring Boot REST APIs for enterprise applications, improving maintainability and application reliability.
- Participated in code reviews, unit testing, Git-based version control, and CI/CD workflows while collaborating in Agile teams.

Projects

SentinelX – Self-Healing Observability Platform

May 2026 – Jun 2026

Java, Spring Boot, Docker, Prometheus, Grafana, Micrometer

GitHub | Live Demo

- Developed a self-healing observability platform using Java and Spring Boot for automated health monitoring, fault detection, and recovery workflows.
- Designed RESTful microservices and implemented health monitoring endpoints using Micrometer, enabling automated diagnostics and fault detection.
- Integrated Docker, Prometheus, and Grafana to enable real-time monitoring, alerting, performance analysis, and operational visibility.

Wise Trade – Intelligent Market Analysis Platform

Apr 2026 – Present

Python, Django, PostgreSQL, REST APIs, Machine Learning

GitHub

- Developed backend services using Django, PostgreSQL, and REST APIs for financial market analysis and news aggregation.
- Designed scalable database schemas and optimized SQL queries to improve application performance.
- Integrated external financial APIs and implemented data-processing pipelines to support market analytics and predictive insights.

Technical Skills

Languages: Java(8+), Python, C++, SQL

Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices, Django, Flask

Databases: PostgreSQL, MySQL, SQL, SQLite

Tools: Git, Maven, Docker, Kubernetes, Prometheus, Grafana, Micrometer, IntelliJ IDEA

Core: Data Structures Algorithms, OOP, DBMS, Operating Systems, Computer Networks, SDLC, Design Patterns

Achievements

- Solved 1000+ Data Structures and Algorithms problems across LeetCode, GeeksforGeeks, and Coding Ninjas, strengthening problem-solving and algorithmic design skills.

Education

B.Tech, Computer Science and Engineering

2021 – 2025

Graphic Era University

CGPA: 9.40/10

Certifications

AWS Cloud Practitioner Essentials — Docker Fundamentals — Kubernetes Fundamentals
